

My name is Annie and I am going to right you a blog and tell you about palm oil and palm trees and give you some information so we can learn more about palm oil and palm trees.

Palm oil comes from an edible vegetables oil that comes from the fruit grown on the African oil palm tree. The trees, which were previously found only in Africa have palm oil in them which is used to make foods like chocolate, ice cream, cookies, packaged bread, margarine and instant noodles.

What is sustainable palm oil?

Green palm defines certified sustainable palm oil and palm kernal oil as produced by palm oil plantations which have been independently audited and certified against the RSPO-Roundtable on sustainable palm oil standard. If we switch to use sustainable palm oil, we can save a lot of the environment and animals.

Animals which are affected include monkeys and orang-utans.

THE PALM OIL PROBLEM

Hello! Welcome to my blog. My name is Charles; I am new to blogs. This blog we will talk about palm oil, and what it's doing to the world so far. Like I said, this is my first blog, so sorry if I get anything wrong, but let's just get right onto the actual blog.

Palm oil is something found in palm trees, and is called many other names including vegetable fat, palm kernel, palm fruit oil, palmate, palmolein and glycerol. Palm oil is making many animals close to extinction, but it is mostly affecting orang-utans.

← Palm oil

Food/items with palm oil may include shampoo, dairy milk, Maltesers, Fanta, skittles, mars bars, Oreos, Doritos, Cola, Burgers, fries, Kit Kat, Pringles, Ritz, Heinz, Nesquik and millions more all containing the same ingredient, palm oil.

<- Chocolate

Sustainable palm oil is a company who makes palm oil, but in a safe area, without chopping many trees and without hurting wild life, making it much safer for animals to go into the area without them getting killed.

Hi my name's Ewan. I'm writing this blog about palm oil and how it effects the planet.

The palm oil tree makes an edible vegetable oil from its fruit. Two different types of palm oil can be produced from the tree. Crude palm oil comes from squeezing the disgusting fleshy fruit. Palm oil trees are native to the country Africa but they were brought to south-east Asia just over 100 years ago as an ornamental tree crop. There are over 40 big country's making palm oil.

The list of foods with palm oil in them

Over 50% of food has palm oil in it like pizza dough, chocolate, shampoo and deodorant. All of them products contain palm oil. That is not the full list.
