

# Lundy Homelearning... Summer Wk33

PLEASE NOTE! Only 2 of you did last week's homework so this week will need to be a repeat. The science here is actually very interesting if you give yourself a bit of time to look into it.

## Science:

Since water boils at 100 degrees C and then turns into water vapour, is it ever possible to superheat water to OVER 100 degrees C? To help you answer this, go onto the following Youtube website (with adult permission/ supervision): [https://www.youtube.com/watch?v=WTVwAZ0\\_9p0](https://www.youtube.com/watch?v=WTVwAZ0_9p0)

## Spag:

1. Decide what is the best way to learn these spellings and learn them for checking next week...

harass   hindrance   identity   immediately   interfere   interrupt  
language   leisure   lightning   marvellous

**DON'T FORGET THIS!!** Private reading is one of the best ways to improve reading!
