

Barum Class - Home learning week ending 15th July

In English this week we have written our own version of a story based on 'Orion and the Dark'. The children have really impressed me with their imaginative story ideas and how well they have written their stories in the first person and using great adjectives in their noun phrases.

In Science this week we have been learning about what different adaptations animals have in to be best suited to the habitat in which they live. We have also been learning about food chains. We have revisited our learning to identify which animals are herbivores, carnivores or omnivores in order to help us make simple food chains.

In Geography the children have thoroughly enjoyed making paper mache globes. They have been learning to name the 7 continents and identify them on globes and atlas'. We have had great fun learning the continents song.

Home learning:

To further support our learning about the continents and oceans, please could you choose a continent and find out some facts about it. For example, you could find out what countries are within the continent, the climate, whether it is north or south of the equator and what animals live there.

Have a great weekend ☺
