

Lundy Homelearning... Autumn Wk14

This week, we have been focusing on our science assessments. This term, children are using writing to demonstrate their understanding and knowledge of science, specifically 'sound'. This has mostly gone very well and many children have brought together their English and science skills very successfully. The class have also tried their first SATs arithmetic paper. Many were surprised at how easy they found it (although the other 2 papers are harder). They also tried a SATs reading paper which is yet to be marked.

Science news! (below)

MyMaths:

Number...Fractions...Y5...Fractions to decimals

Number...Fractions...Y5...Decimal place value

Number...Fractions...Y5...Ordering decimals

REMEMBER!! Do the Lesson AND the homework please.

Grammar/ Spelling:

Write down the difference between how a dash is used compared with a hyphen.

Make up or find 5 examples of hyphenated words or phrases.

Topic: What are 'homing pigeons' and how were they used in WW1. How many were used? What was their success rate in getting through to their destination? (It's a very high percentage!)

NOTE: WW1 research **MUST** be carried out either with your parent/ carer's permission or with them closely supervising you! Obviously, some images and text are not suitable for Y6s!

DON'T FORGET THIS!! Private reading is one of the best ways to improve reading...and therefore, your SATs scores!
