

# Ocean Zones

In the deep end  
In the midnight zone  
Lurks an angler fish  
Waiting for an eel  
But...  
How does he know about eels?  
They live in the twilight zone  
Where dusk has made its way  
With his friends...  
The grey whale,  
The crab  
And the clam  
Meanwhile.....  
The angler fishes friends are  
Giant squid,  
Viper fish,  
And sharks  
All in the midnight zone  
Where it is always night.
