Saunton home learning

In maths this week we have been exploring multiplication of larger numbers using a formal written method. We have been continuing to research and write about rainforest life and presenting our findings for our topic books.

Home learning:

We will be making our bug houses next week with Miss Lucas, so you can gather and bring to school on MONDAY any resources you wanted to use from your garden. You will have the opportunity to gather natural resources from our forest school garden.

Reading

As we are approaching the end of term continue to read regularly. Complete a character profile for your favourite story character or from a book that you are reading at home currently.
