

1/10/21 Saunton Class Home learning

We have had a really busy and fun-filled week.

The children had a wonderful time on our trip to Exmoor. They learnt a lot about the physical features of the area and went pond-dipping to investigate what life is found in the streams. The children were resilient, behaved brilliantly and were great fun to be with in typical Exmoor weather! We hope despite being soggy they shared with you some of the fun and challenges from the day.

Thank you all for your patience and understanding at the end of the day. Mrs Lake and Mrs Smale did a fantastic job keeping you all updated as best they could. Thank you also for the kind words spoken as we got off the bus and the messages emailed in overnight, we do appreciate them and it's lovely to read how much the children enjoyed their day.

We enjoyed our Harvest Festival and the children sang beautifully. We carried out some chutney tasting and the children made predictions about the ingredients. Weather permitting you are invited to the top playground on Tuesday 5th October at 2.45pm to listen to the songs.

The swimming instructors commented on the great progress the children are making and how wonderful their behaviour was this week.

Home Learning

Reading Challenge

Continue to read at least 4 times a week and sign in the back of your book.

Topic - this is a 2 week activity

Find out about the animals we found in the streams on our trip to Exmoor. (Newts, pond-skaters, water beetles, dragon-fly larvae, stone flies, fresh-water shrimps)

Create an attractive information leaflet using the facts that you find; draw pictures and write informative sentences to tell someone who is visiting Pinkery, what they will find there.
